## **Statement of Circumstances - Financial Year 2026/27**

Maleny Dairies Pty Ltd

Maleny Dairies may enter into Milk Supply Agreements from time to time to meet its operational and customer requirements.

Maleny Dairies may decline to enter into any new Milk Supply Agreement where sufficient milk supply has already been secured to meet those requirements.

Where Maleny Dairies seeks to procure additional milk, the following circumstances will generally apply:

- (a) The farm is capable of supplying milk with a butterfat level generally not less than 4.0% (weight/volume) and a protein level generally not less than 3.1% (weight/volume);
- (b) The farm has sufficient milk storage capacity and collection access to enable safe, efficient and commercially practical milk collection by Maleny Dairies;
- (c) The supplier holds all licences, approvals and registrations required for the production and supply of raw milk;
- (d) The supplier complies with all applicable laws and regulations relating to milk production, food safety, animal welfare and environmental management; and
- (e) The supplier satisfies any reasonable assessment and verification requirements requested by Maleny Dairies.

This Statement of Circumstances does not constitute an offer to acquire milk and does not create any obligation on Maleny Dairies to enter into a Milk Supply Agreement with any supplier.
